DETAILED ACTION

Allowable Subject Matter

1. Claims 1, 3-9 are allowed.

1. The following is an examiner's statement of reasons for allowance: independent claim(s)

1 teaches a terminal interface receives an I/O source document for a network element that is converted to an HTML format, the interface has a adapter database toolkit that responds to customer commands by extracting information about TL1 commands from the document to generate information in an XML file to be used by the adapter database specifically for the network element, and an operator interface command window that facilitates construction of TL1 commands for entry.

2. The closest prior art of record, Chen, do not teach an operator interface to facilitate the construction of TL1 commands for entry based on the above adapter database, HTML document and XML file. Therefore, independent claim 1 is allowable over the prior art.

3. Claims 3-9 are allowed by the same rational as well as the further limitations added by these dependent claims.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
